### **Unternehmensbeschreibung:**

Coral Telecom Ltd. Is a well integrated company into design, development, manufacture and deployment of telecom solutions. It has sale and service infrastructure spread across the length and breadth of India in terms of its own branch locations at 14 cities. Coral also has ISO resellers, each operating in niche areas within the country and at over 14 locations worldwide. Coral has done large telecom projects both in private and government sector. These projects include development and deployment of complete end to end communication network.

#### Enterprise Switches

The enterprise switches designed by Coral, branded as IRIS-IVDX, scale up to a capacity of 8000 ports. This IP ready switch is a one stop solution for all the telecommunication needs of an enterprise that supports data and video switching capability along with voice.

#### IP Capabilities

IP DSLAM, amongst the most cost effective designs from Coral meets stringent carrier grade specifications. Combined with the VoIP solution of Coral, this platform is a powerful tool for providing triple play. Services over the last mile copper network. The VoIP solution from Coral includes integrated VoIP gateways and gatekeepers.

#### STM 1 & DLC Capabilities

Coral has designed and deployed STM-1 based Customer Premises Equipment and Add-DropMux, which can be used in the optical access networks. This solution, combined with the IRIS switch offers one of the most versatile Digital Loop Carriers (DLC) solutions, that can cater to the needs of Next Generation Broadband Networks.

#### Coral Design House capabilities

Coral's software expertise acquired over the years, in writing specialized software & algorithms, have proved successful in development of powerful yet efficient computational models. These techniques along with expertise in DSP & FPGA make us designs efficient and cost effective. The expertise can be outsourced to meet your design needs and customization through "Coral Design House. It has the state-of-the-art Design and Development facility at Noida in India, where a dedicated team of engineers is involved in technology oriented design development. Coral is an ISQ 9001 certified firm and firmly believes in quality at all its activities.

**Produkte:**

SDH products including STM1 CPE's STM ADM, PD Mux, IPDLSAM's, Multi Service Access Gateway's (MSAG), Enterprise switches up to 8000 ports and GSM/CDMA gateways.
