**Industry:** Software Testing / Business Analysis / Project Management - Services for all domains

Our Industry focus has spread over a wide range of multiple domains & various technologies. The key domains we have addressed include Banking, Finance, Insurance, Health care, Real Estate, Retail, ERP, Supply chain management. Our Technology Expertise includes Microsoft, Java, IBM & Netscape etc.

### **Company-profile:**

Grapesoft is an ISO 9001:2000 certified leading Software Testing, Business Analysis and Project Management solution Provider with head quarters in Toronto, Canada and branches in New Zealand, Australia, US and offshore services in Hyderabad, India. We are on a move to provide off-shore services to the Fortune 500 companies all over the world.

We have a highly qualified team, which makes use of the proven methodology/tools and provide success in numerous projects worldwide. It boosts up our morale and thus helps in providing the best quality software project management solutions, delivered on time

**Services: We provide software testing, business analysis & Project management - (Onsite & offshore) services and solutions.**

#### **Software Testing**

We deliver solutions for business critical applications/products. We provide Technologies based testing services with an option to choose from both onsite / offshore. We expertise on Functional Testing (System, Integration, Database) and Non Functional Testing (Performance, Compatibility, Load and volume). We provide specialised Testing for Embedded, Mobile, ERP and high end security applications.

#### **Business Analysis**

we are the first company to startup with Onsite/ Offshore BA services and among the top 4 companies to get IIBA Endorsed. We provide a scalable requirement process for deploying different kinds of projects which is customized and tailored as per the business and client's needs for both IT & Non IT companies

**Project Management**

Our solution to Project Management is to deliver the project within the defined constraints which includes time, cost & efforts to complete the project. We strictly follow Project life cycle to achieve & make impossible, possible. We offer solutions to both IT & NONIT companies.

**Technology-exploitation:**

Microsoft, IBM, Open source
