Unternehmensbeschreibung:

Integra Micro Software Services (IMSS) is a wholly owned subsidiary of Integra Micro Systems (IMS) a 24-year-old software company. Integra (IMSS) focuses on providing software Services to leading Telecom companies. The focus of the company is in providing offshore development services for global customers in system software areas such as Telecom, Software development tools, Embedded Systems, Device Drivers, networking and Business application areas such as Manufacturing, finance and Telecom billing.

Produkte:

Transaction Terminal is a device that can be used in any application that requires identifying and authenticating the user. Voice guidance feature enables illiterate and rural people in developing countries to take advantage of the digital convergence. The terminal mitigates the risks associated with Para banking and micro finance in both urban and rural areas. The device also ensures proper implementation and delivery of facilities meant for the poor people. With RFID and biometric authentication, the device contributes towards E-governance - that includes Electronic passport, Driver License, Road tolling, Supply chain, Security and Access control, etc.
