- Software

Company-profile:

MindGrid is an Information Technology company established in November 2004. We provide innovative solutions to leading corporations and government agencies globally. We are single point support for all software needs of its clients. Whether it involves developing customized software solutions- on-site or offshore or providing onsite-consulting support, MindGrid continuously transforms its expertise into productivity gains for its clients.

At MindGrid we,

- Emphasize on long-term, value added relationships with a commitment to understand our client's business needs. Establish partnerships, not merely project engagements.
- Provide advice and solutions that are product, platform and technology independent.
- Provide knowledge transfer that benefits our clients short term and long term needs, much after project completion, and ensures seamless departure that upgrades their in-house skills and self-sufficiency.
