Unternehmensbeschreibung:

SkandSoft is a Mumbai, India based software company focusing on AIDC/ RFID middleware and related solutions, SETU being the flagship product. SkandSoft is among the 12 companies worldwide to obtain the EPC Global Software Certification. The company has also won the prestigious 2006 RFID Emerging Technology of the Year Award from Frost & Sullivan. SkandSoft is currently working with over half a dozen global brands in deploying the first instances of commercially ready enterprise solutions using RFID and allied technologies across manufacturing, banking and the service industry verticals.

Produkte:

SETU is engineered to facilitate accelerated solution development of multiple AIDC solutions across functional verticals including supply chain management, warehouse management, asset management, visitor management and document management for vertical industries including defense, banking, healthcare, aviation, retail and manufacturing.

The SAP NetWeaver platform powers the SAP Business Suite family of applications, SAP xApps™ packaged composite applications, and solutions SETU. SAP NetWeaver unifies integration technologies into a single platform and is pre-integrated with business applications, enabling change and reducing the need for custom integration.
