### **Company-profile:**

SPRYLOGIC TECHNOLOGIES LTD.

although is an offshoot of "Aplab Ltd", it inherits more than 45 years of ripe experiences in wide range of Test & Measuring Instruments, Industrial & Banking Automation Products and Embedded Technology Products. Emphasizing on our acumen in providing Software Solutions & Services, we build our strengths that are unique and unparallel. We undertake the modification and/or re-engineering of the hard wares presently in practice and do the immense Value-Addition by creating and integrating the exclusive Software Products that are based on cutting edge technologies.

We also step into product development that will draw multidimensional benefits and prove the efficacy of the spectacular array of Hardware and Software Technologies. We have created the niche and can offer a single window Service for tackling the entire gamut of technologies in Hardware as well as Software and render the Solutions together with the Services that are in the offing and carry out Business Integration Automation.
