Unternehmensbeschreibung:

Vernalis Systems provides IT solutions that blend business and technological expertise. Each application they develop reflects both their mastery of technology and a deep understanding of the client's business requirements. Their Internet / Intranet, Client / Server and Groupware solutions are built using the most up-to-date technologies including J2EE, .Net, Open Source, Domino / Lotus Notes and CAD / CAE. Their range of clients includes multi-national professional Services companies, national financial services companies, sports and entertainment organizations, and small and medium businesses. Their business domain knowledge extends to finance, compliance, ERP, human resources, security, space management, healthcare, workflow, business networking, and web presence among others.
