**Unternehmensbeschreibung:**

Efftronics Systems Pvt. Ltd., a Technology driven InfoTech Company is incepted in the year 1985, a 20 Year young enterprise with Experience in Conceiving, Designing, Developing, Manufacturing and Implementing Customized Embedded solutions along with Application Software in the areas of 1. Data Acquisition, 2. Data Processing, 3. Data Communication, 4. Data Controls, 5. Data Dissemination (thro'visual, Voice Modes), 6. Instrumentation And Controls.

Efftronics, with microprocessor based LED Electronic Display Systems as its initial Products, entered into information technology with sophisticated Data Acquisition Systems like Data loggers to monitor the Signaling System of Indian Railways, Software for automatic Train control Charting & with new products like Universal solid state block instrument conforming to European Safety Standards. Successfully installed 2000 data loggers with 45 networks over the 16 Zones of Indian Railways. They have covered up to 35% Stations of Indian railways. The turnover of the company as on 31st march 2006 is 20.2 crores. Our strength is 403 members.

Their philosophy is to develop new products which is useful to the society with a Vision of "TO PROVIDE INSIGHT FOR ENHANCING WEALTH"

**Produkte:**

Embedded systems & software in the areas of data acquisition, data processing, data communication, data dissemination and instrumentation and control.
